# eLearning module: Data protection

Our effective eLearning module on data protection uses audio and video to teach you in just **15 minutes** what you need to be aware of when it comes to data protection and what dangers are lurking.

A large number of SMEs and large companies with a total of **over 10,000 employees** have already successfully completed our module on data protection. Convince yourself of the quality and **test the short extract now without obligation: [www.infosec.ch/test-dsg](http://www.infosec.ch/test-dsg).**

## Your advantage:

- ✓ **Motivating:** Short training units are more motivating than long sequences. This module takes just 15 minutes to complete.
- ✓ **Customisable:** In order to offer your employees maximum practical relevance, the module can be customised to your company's requirements and circumstances.
- ✓ **Varied:** The learning content is delivered using different techniques (e.g. audio and video) and is smartly designed.

We know how to present complex topics such as data protection in an understandable form.

I look forward to hearing from you and am at your disposal for any questions.

# eLearning module: Artificial intelligence

Whether **ChatGPT, DeepL or other practical tools**: your employees are increasingly coming into contact with artificial intelligence.

Our eLearning modules sensitise your employees for AI in an **efficient and entertaining** way.

The modules provide basic knowledge about AI, focus on security or deal with the phenomenon of deepfakes. Test the short extract now with no obligation: [www.infosec.ch/test-ki](http://www.infosec.ch/test-ki)

## The advantages:

- ✓ **Motivating:** Short training units are more motivating than long sequences. The processing time for these modules is just 5 - 15 minutes each.
- ✓ **Customisable:** In order to offer your employees maximum practical relevance, the modules can be adapted to your company's needs and circumstances.
- ✓ **Varied:** The learning content is taught using a variety of techniques (e.g. audio and video) and is designed in a smart way .

Utilise the advantages of artificial intelligence, but safely and securely. We show your employees how.

I look forward to hearing from you and will be happy to answer any questions you may have.
