SWISS INFOSEC

35 YEARS

# eLearning module:
# Artificial intelligence

Whether **ChatGPT, DeepL or other practical tools:** your employees are increasingly coming into contact with artificial intelligence.

Our eLearning modules sensitise your employees for AI in an **efficient and entertaining** way.

The modules provide basic knowledge about AI, focus on security or deal with the phenomenon of deepfakes. Test the short extract now with no obligation: **www.infosec.ch/test-ki**

SWISS INFOSEC — AI int... — Infosec... — eLearn...

SWISS INFOSEC — DEEPFA... — Infosec Acad... — eLearning ... — www.infosec.ch

SWISS INFOSEC — Using... i... — Inf... — eLearn...

SWISS INFOSEC — ⏱ 10 minutes — Using AI securely Part 1 — Infosec Academy — eLearning module — www.infosec.ch

## The advantages:

✓ **Motivating:** Short training units are more motivating than long sequences.
The processing time for these modules is just 5 - 15 minutes each.

✓ **Customisable:** In order to offer your employees maximum practical relevance, the modules can be adapted to your company's needs and circumstances.

✓ **Varied:** The learning content is taught using a variety of techniques (e.g. audio and video) and is designed in a smart way .

Utilise the advantages of artificial intelligence, but safely and securely. We show your employees how.

I look forward to hearing from you and will be happy to answer any questions you may have.
